
Environmental Safety and Health Policy

Our Commitment... Targa is committed to protecting the environment and the health and safety of everyone who plays a part in our operations, lives in the communities in which we operate, or uses our products. Wherever we operate, we will strive to conduct our business with respect and care for the environment and systematically manage risks to drive sustainable business growth.

Safety is a top priority at Targa. We work to promote a safety-first culture and to operate our assets in a way that exceeds industry standards. Our goal is for everyone to go home safe at the end of every day.

We are focused on minimizing our impact on the environment and creating environmental awareness, as we work to safely and responsibly fulfill our role in the energy value chain. We are committed to:

- reducing our emissions including greenhouse gas and non-greenhouse gas emissions
- conserving and efficiently utilizing natural resources,
- managing our water usage
- minimizing waste,
- reducing spills,
- protecting biodiversity, and
- practicing effective land stewardship.

Working to meet or exceed relevant environmental, safety, and health regulations and requirements is an essential priority, and all employees share responsibility for ensuring compliance.

Our Plan... We use our environmental and safety management systems to implement our commitments. By reporting regularly on environmental and safety issues to our Board of Directors, we can drive a culture of continuous improvement. At Targa, our plan to meet our commitment includes:

- Demonstrate visible and active leadership that engages employees and service providers and manage environmental, safety and health (ES&H) performance.
- Ensure that all employees and contractors understand that working safely is a condition of employment, and that they are each responsible for their own safety and the safety of those around them.
- Promote ES&H awareness and responsibility through training to ensure employees are competent to perform their assignments effectively and safely.
- Manage all projects and processes through their life cycles in a way that protects safety and health and minimizes impacts on the environment.
- Provide employees with the resources necessary to instill personal ownership and motivation to achieve ES&H excellence.

- Provide relevant safety and health information to contractors and require them to provide proper training for the safe, environmentally sound performance of their work.
- Measure, audit and publicly report ES&H performance and maintain open dialogue with stakeholder groups and with communities where we operate.
- Work with both governments and stakeholders where we operate to develop regulations and standards that improve the safety and health of our operations.
- Maintain a secure work environment to protect ourselves, our contractors and the company's assets from risks of injury, property loss or damage resulting from hostile acts.
- Communicate our commitment to this policy to our subsidiaries, affiliates, and contractors and seek their support.

Our Expectations... Through implementation of this policy, Targa seeks to earn the public's trust and to be recognized as a leader in ES&H performance.
