Certain statements in this release are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical facts, included in this release that address activities, events or developments that the Company expects, believes or anticipates will or may occur in the future, are forward-looking statements.

These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties, factors and risks, many of which are outside the Company’s control, which could cause results to differ materially from those expected by management of the Company. Such risks and uncertainties include, but are not limited to, weather, political, economic and market conditions, including a decline in the price and market demand for natural gas, natural gas liquids and crude oil, the impact of pandemics such as COVID-19, commodity price volatility due to ongoing conflict in Ukraine, actions by the Organization of the Petroleum Exporting Countries (“OPEC”) and non-OPEC oil producing countries, the timing and success of business development efforts, the completion of the acquisition of Lucid Energy Delaware, LLC (“Lucid”), which may not be completed on a timely basis or at all, expected benefits relating to the acquisition of Lucid and their impact on the Company’s results of operations, and other uncertainties.

These and other applicable uncertainties, factors and risks are described more fully in the Company’s filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K, and any subsequently filed Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. The Company does not undertake an obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

(1) Common stock outstanding as of May 3, 2022
**Premier Midstream Infrastructure Company**

Integrated assets that connect natural gas and NGL supply to domestic and international demand markets

**Wellhead to Water Solution**

- **Substantial natural gas gathering and processing in multiple basins**
  - 44 natural gas processing plants\(^{(1)}\)
  - ~9.1 Bcf/d gross processing capacity\(^{(1)}\)

- **Grand Prix NGL Pipeline connects G&P volumes to Mont Belvieu fractionation and export assets**

- **Premier NGL fractionation footprint in Mont Belvieu**
  - 9 fractionation trains
  - ~840 MMBbl/d gross fractionation capacity\(^{(2)}\)

- **Superior connectivity to U.S. petrochemical complex and top-tier LPG export facility\(^{(3)}\)**
  - ~12.5 MMBbl/month effective working capacity

---

\(^{(1)}\) Pro forma Permian Midland and Permian Delaware plant additions scheduled to be completed between 2022 and 2023, and the expected idling of the Sand Hills plant. Does not include acquired assets.

\(^{(2)}\) Includes 40 MMBbl/d of back-end capacity and does not include Targa’s equity interest in GCF; GCF facility was idled in January 2021 but is available for reactivation subject to prevailing market conditions and agreement with our partners.

\(^{(3)}\) Connected to Mont Belvieu, the U.S. NGL hub, which handles the majority of U.S. NGLs. Export facility has an effective working capacity of 12.5 MMBbl/month, and this capability is dependent on the mix of propane and butane demand, vessel size and availability of supply, among other factors.
Strategic Outlook

Integrated NGL business, coupled with strong business fundamentals support increasing cash flow outlook

Diverse & Vertically Integrated Asset Platform
- Targa’s operations connect natural gas and NGLs to markets with increasing demand for cleaner fuels and feedstocks
- Premier asset base connects wellhead volumes in leading basins, including the Permian, with Gulf Coast and export markets

Significant Financial Flexibility
- Strong investment grade balance sheet
- Robust free cash flow profile underpinned by significant embedded operating leverage and strong fee-based earnings

Positioned for Long-Term Success
- Focused on long-term business sustainability and ESG
- Single C-Corp public security with excellent alignment with common shareholders; included in S&P 400

Committed to safety, reliability and environmental stewardship
Investing in high-return projects that leverage integrated system
Positioned to return increasing capital to shareholders over time
FCF Profile Drives Longer Term Financial Flexibility

Maintaining balance sheet strength and financial flexibility over the long-term remain a key priority

- Continuing to invest in attractive organic growth projects
- Strong business performance and embedded operating leverage driving adjusted EBITDA growth and robust FCF generation
- In position to return incremental capital to shareholders over time via common dividend increases + common share repurchases
- Available liquidity of ~$2.0 billion\(^{(1)}\) with nearest senior note maturity in 2027\(^{(2)}\)

---

\(^{(1)}\) Available liquidity as of March 31, 2022 and includes aggregate borrowing capacity under the TRGP revolver, AR Securitization Facility, and cash on hand.

\(^{(2)}\) In April 2022, the Partnership redeemed any and all its outstanding 5.875\% Senior Notes due 2026.

\(^{(3)}\) Full year 2022 adjusted EBITDA estimate does not include Lucid Energy acquisition. Adjusted EBITDA is a non-GAAP measure. Please see the section of this presentation entitled “Non-GAAP Financial Measures” for a discussion of adjusted EBITDA and a reconciliation of such measure to its most directly comparable GAAP financial measure.
Updated standalone full year 2022 adjusted EBITDA estimate is now ~30% higher than 2021 adjusted EBITDA(1)

FY 2022 updated adjusted EBITDA estimate driven by:

✓ Higher commodity prices
✓ Higher volumes through G&P and L&T systems
✓ Inclusion of the SouthTX acquisition
✓ Continued hedge execution

Updated standalone full year 2022 estimate does not include Lucid Energy Acquisition

(1) Adjusted EBITDA is a non-GAAP measure. Please see the section of this presentation entitled “Non-GAAP Financial Measures” for a discussion of adjusted EBITDA and a reconciliation of such measure to its most directly comparable GAAP financial measure.
(2) Revised full year 2022 adjusted EBITDA estimate does not include Lucid Energy acquisition.
(3) Average full year commodity price assumptions for initial full year 2022 outlook; for updated full year outlook as revised in June 2022, reflects commodity price assumption for July through December 2022.
(4) Targa’s composite NGL barrel comprises 45% ethane, 31% propane, 11% normal butane, 4% isobutane and 9% natural gasoline.
Integrated Platform Supports Fee-Based Profile

Durable earnings power from significant fee-based margin across Targa businesses

Segment Business Mix 2022E(1)

- Permian Basin
- Badlands
- SouthOK / WestOK
- North Texas / SouthTX

~55% / ~45%

Fee-Based Profile 2022E(1)

- Gathering & Processing
- Logistics & Transportation

>80% Fee-Based

Targa Field G&P Plant Natural Gas Inlet Volume Mix(3)

- Permian
- WestOK & SouthOK
- SouthTX
- North Texas
- Badlands

~74%

Permian

(1) Segment business mix and fee-based profile based on fully consolidated 2022E operating margin and adjusted operating margin, respectively, including 100% interest in Badlands.
(2) Fee-based margin in G&P segment includes Badlands (fully consolidated adjusted operating margin), SouthOK, SouthTX and significant portions of Permian Delaware, Permian Midland, and WestOK.
(3) Based on average inlet for three months ended 3/31/2022; Targa Badlands also includes significant crude infrastructure position.
Risk Management

Risk management framework further strengthens cash flow stability

Credit Risk Management

- **Gathering & Processing**
  - Targa is predominantly in a net payable position to its G&P customers
  - Diverse group, with many IG and large well capitalized producers

- **Logistics & Transportation**
  - Targa is predominantly in a net payable position to customers in its NGL transportation and fractionation businesses
  - Diverse group, primarily IG and large well capitalized firms
  - LPG export customers are either IG or required to post an LC to cover exposure

Revenue from Top 25 Customers\(^{(1)}\)

- ~80% of revenue from top 25 customers is investment grade (“IG”) or backed by a Letter of Credit (“LC”)
- Top 25 customers represent ~70% of total revenue

Hedging Program

- Targa employs a programmatic hedging program, with rolling quarterly targets, to manage its equity exposure under POP contracts in its G&P segment
- Targa seeks to be ~75% hedged in year 1, ~50% hedged in year 2, and ~25% hedged in year 3

Top 10 Permian G&P Counterparties\(^{(2)}\)

- ~80% of volume from Top 10 customers is investment grade (“IG”)
- Top 10 counterparties represent ~75% of total Permian volume

- IG or LC Backed
- Non-IG or Non-LC Backed

(1) Based on consolidated revenue for the three months ended March 31, 2022.
(2) Based on 2021 average daily inlet volumes.
Strategic Permian Basin Acquisition of Lucid Energy
Key Acquisition Benefits

$3.55 billion acquisition of leading G&P system in the Permian Basin increases Targa’s size and scale

Leading Gathering and Processing System in the Prolific Delaware Basin
- >600,000 dedicated acres, supplemented by significant volumes subject to minimum volume commitments, in the core of the Delaware Basin with breakeven oil prices of ~$40/bbl
- ~1,050 miles of pipeline and ~1.4 Bcf/d natural gas processing capacity\(^{(1)}\); vast majority of assets constructed within the last 5 years
- 20+ years of remaining high-quality drilling inventory based on current rig activity

High-Quality Producers with Attractive Long-Term Fixed-Fee Contracts
- Diverse, blue chip customer base
- ~70% of current volumes sourced from investment grade producers
- Long-term acreage dedications; predominantly fixed-fee contracts that increase Targa’s overall fee-based margin

Complements Targa’s Integrated Wellhead to Water Permian NGL Strategy
- Potential over time to move significant incremental volumes through Targa’s L&T systems (NGL transportation, fractionation, LPG export services)
- Completion of transaction expected in third quarter of 2022, subject to customary closing conditions, including regulatory approvals

Attractive Investment Multiple; Pro Forma Leverage Well Within Long-Term Target Range
- Acquisition multiple of ~7.5 times estimated 2023 adjusted EBITDA; near and longer-term synergy potential reduces acquisition multiple over time
- Immediately accretive to distributable cash flow per share and supports ability to return increasing amount of capital to shareholders
- Acquisition to be funded with available liquidity, including from cash on hand, existing $2.75 billion revolving credit facility, and committed debt financing
- Pro forma year-end 2022 leverage ratio estimated to be about 3.5 times and improving thereafter; well within long-term target range of 3-4 times

\(^{(1)}\) Includes the 230 Mmcf/d Red Hills VI plant, which is estimated to be in service September 2022.
Targa’s Pro Forma Position in the Delaware Basin

Expanding and diversifying Targa’s Permian G&P position into the most active and prolific region of the Delaware Basin

- Long-term fixed-fee contracts
- Long-term dedications from high-quality producer customers
  - Underpinned by >600,000 dedicated acres, supplemented with additional volumes subject to minimum volume commitment
  - ~70% of current volumes sourced from investment grade producers
- ~50% of acquired assets’ dedicated acres on federal land
  - Dedicated acres on federal land already under lease and the vast majority is held by production

Overview of Acquired Assets

<table>

(1) Includes the 230 Mmcf/d Red Hills VI plant, which is estimated to be in service September 2022.
Integrated Infrastructure Platform
Permian Basin is a World-Class Resource

Targa’s leadership position in the Permian and integrated platform provide reliable access to NGL hub in Mont Belvieu

Permian Crude Oil Production Forecast\(^{(1)}\)

- Current: ~5.0 MMBbl/d
- YE27: ~7.3 MMBbl/d

Permian Gross Gas and NGL Production Forecast\(^{(1)}\)

- Current: ~20 Bcf/d gross gas & ~2.5 MMBbl/d NGLs
- YE27: ~30 Bcf/d gross gas & ~3.7 MMBbl/d NGLs

Targa’s Inlet Volume Growth has Outpaced Permian Basin Production\(^{(2)}\)

Permian Production - Associated Gas

- Current: ~3.3x
- YE27: ~3.5x
- 2020/2021 GORs reflect new activity levels relative to vintage well performance

Higher GORs Benefit Targa’s Capture of Permian NGL Supply\(^{(2)}\)

- Permian Basin GORs have increased ~20% since 2018

\(^{(1)}\) Source: BTU Analytics – April 2022; NGL Production forecast assumes current recovery factors.

\(^{(2)}\) Source: EIA Drilling Productivity Report – April 2022.
Targa’s Premier Permian Asset Footprint

Super-system across the Midland and Delaware Basins with significant access to NGL supply

Multi-plant, multi-system Permian footprint, complemented by Grand Prix NGL Pipeline integration and connectivity to natural gas residue takeaway pipelines

Premier Permian G&P position backed by significant acreage dedications from diverse producer group

26 plants with ~4.7 Bcf/d(1) of total gross natural gas processing capacity

Source: Enverus; rigs as of April 19, 2022.

(1) Includes Legacy I plant expected in Q4 2022, Legacy II plant expected in Q2 2023, and the Midway plant expected in Q3 2023, and the expected idling of the Sand Hills plant. Does not include acquisition of Lucid Energy.
Permian Midland Expansions

Midland Basin processing expansions provide attractive integrated returns

Strategic Merits

✓ To support increasing activity and production outlooks, Targa is adding an incremental 550 MMcf/d of natural gas processing capacity in the Midland Basin – Legacy I plant in 4Q22; Legacy II plant in 2Q23

✓ Substantial portion of NGLs available to transport on Targa’s Grand Prix NGL Pipeline and direct to Targa’s fractionation complex in Mont Belvieu

✓ Expansions provide attractive integrated Targa returns

✓ Incremental G&P volumes supported with fee-floor structures

✓ Electric-driven processing plants will improve operational performance

✓ Incremental capacity to enhance overall system operational flexibility
Permian Delaware Expansion

Expansion provides attractive integrated returns and enhances operational performance

Strategic Merits

- New 275 MMcf/d plant (Midway plant) in the Permian Delaware expected to begin operations 3Q23
- Modernized equipment to enhance operational performance, reliability and reduce operating costs (older Sand Hills plant to be idled)
- Substantial portion of NGLs available to transport on Targa’s Grand Prix NGL Pipeline and direct to Targa’s fractionation complex in Mont Belvieu
- Expansions provide attractive integrated Targa returns
- Increases connectivity with bi-directional flow capabilities between Targa Midland and Delaware Basin systems
- Increases run-rate performance and improves NGL recoveries
Targa is one of the largest daily movers of NGLs in the Permian Basin
Targa can direct the vast majority of its NGL production to its fractionation facilities in Mont Belvieu

Grand Prix NGL Pipeline connects and directs significant NGL volumes to Targa’s fractionation complex in Mont Belvieu

Grand Prix connects supply to the NGL market hub and to Targa Downstream assets
Grand Prix is positioned to benefit from growth in Permian supply and NGL production from Targa plants and from third-parties
NGL Market Hub With Global Reach

Logistics assets exceedingly difficult to replicate, fee-based businesses, with significant take-or-pay

Premier Fractionation Ownership Position in Mont Belvieu

- Mont Belvieu is the U.S. NGL market hub developed over decades of industry investment
- ~840 MBbl/d\(^1\) gross fractionation capacity in Mont Belvieu; 55 MBbl/d in Lake Charles
- 54 MMBbls of storage capacity in Mont Belvieu
- Superior connectivity to demand (U.S. petrochemical complex and exports)

LPG Export Services Business Connects to Global Demand

- Effective LPG export working capacity ~12.5 MMBbl/month (nameplate loading capacity up to ~15 MMBbl/month)\(^2\)
- Targa advantage - connected to fractionation, storage, supply/market interconnectivity, refrigeration, and de-ethanizers
- Differentiated facility due to commercial and operational flexibility on vessel size and cargo composition
- LPG exports provide critical source of cleaner fuels for developing nations

LPG Exports by Destination & Product Mix\(^3\)

- Propane
- Butane

\(^1\) Includes 40 MBbl/d of back-end capacity and does not include Targa’s equity interest in GCF; GCF facility was idled in January 2021 but is available for reactivation subject to prevailing market conditions and agreement with our partners.

\(^2\) Effective capacity based on current product mix of ~70%/30% propane/butane; nameplate operational capacity up to ~15 MMBbl/month based on supply availability, product mix, vessel schedule, among other factors.

\(^3\) Trailing twelve months ended March 31, 2022.
ESG – Environmental, Social, Governance

Targa is part of the energy infrastructure that is delivering safe, reliable energy to global communities

Environment & Safety

- We recognize that our commitment to implement programs and practices to improve environmental performance and minimize risk is important to the sustainability of our business
- We have adopted the following goals: (1) lowering our methane intensity, and (2) reducing flaring
- We strive to continuously improve our safety performance through our vision of “Zero is Achievable,” which is rooted in our belief that we can achieve zero accidents

Governance

(Includes Board Sustainability Committee)

Our corporate governance practices and policies are reflected in our Corporate Governance Guidelines, Code of Conduct and Code of Ethics

Social

- We employ a talented and dedicated workforce and are committed to our employees’ safety, health, and development
- We work to promote a respectful and inclusive workplace that embraces differences and appreciates each other’s contributions to common and individual goals
- We are dedicated to fostering trust with our employees, shareholders, and communities

More information around Targa’s efforts in the areas of Safety, Environment, Social and Governance can be found in our 2020 Sustainability Report, available on our website at www.targaresources.com/sustainability
We Own and Operate Critical Infrastructure

Our operations are essential to the efficient, safe, and reliable delivery of energy across the U.S. and increasingly the world

- Targa’s operations connect natural gas and NGLs to domestic and international markets with growing demand for cleaner fuel and feedstocks
- We believe that natural gas, NGLs and LPG will continue to play an important role in the energy transition to a lower carbon future for decades to come
  - Source of cheap and reliable energy with lower emissions that offset coal
  - Fills the gap in energy demand that renewable energy cannot meet
- We are focused on capturing opportunities and managing risk to continue to create long term value for our shareholders, our partners, and our communities

✓ Safety
✓ Operational excellence
✓ Environmental stewardship
✓ Community engagement
Global Demand Outlook and the Call on U.S. Supply

Increasing global energy demand requires diverse supply source; U.S. exports expected to fuel future energy needs

- Total energy demand forecasted to grow ~26% between 2020 and 2050 driven by global population growth, emerging markets and developing economies
- Natural gas mix expected to maintain >20% share of global fuel demand throughout forecast period – affordable and reliable supply, displaces higher carbon emitting fuels, increasing industrial demand, and baseload from power generation

- Increasing global energy demand is expected to rely on U.S. supply and future exports of natural gas (LNG) and NGLs (ethane and LPGs)
- The U.S. is well positioned to meet growing demand for cleaner fuels and feedstocks, including natural gas and NGLs, which support economic growth and social advancement in developing nations

---

(2) Source: U.S. Energy Information Administration Annual Energy Outlook (AEO2022); February 2022.
Targa is Well-Positioned to Support Global Energy Needs

Targa’s facilities exported ~4.9 billion gallons of LPGs globally in 2021 and helped reduce global CO₂ emissions

- LPGs are replacing biomass in many rural communities, and LPG demand is growing in China, India, Indonesia, Bangladesh and across many countries in Africa
  - Where electricity is not available, the use of LPGs have a positive impact on the health and prosperity for local people in these nations by offering a cleaner energy cooking solution
  - LPGs are a reliable energy source that is easily transported and stored with significantly lower emissions

- LPGs advance the United Nations’ 2030 Agenda for Sustainable Development, including the achievement of goals directed towards health, poverty, women, children, environment, deforestation, energy and climate
  - ~3 billion people (>35% of the global population) still rely on solid fuels and kerosene for cooking\(^1\)
  - The lack of access to clean fuels contributes to the death of >4 million people each year\(^1\)

- LPG use supports and enables inclusive economic growth, promotes gender equality, protects the environment, and saves lives

(1) Source: World LPG Association (WLPGA) - Based on difference in CO₂ emissions from average of propane and butane versus wood, coal, and kerosene.
(2) Represents the total CO₂ equivalent for each fuel source relative to the ~4.9 billion gallons of LPGs, in aggregate, exported from Targa’s facilities in 2021. Each fuel source converted to million British Thermal unit (MMBtu) based on its respective heating value (Btu equivalent) and then applied its respective CO₂ emissions as determined by EPA (40 CFR Part 98; 40 CFR Part 89), EIA, and Utah State Forestry Extension.
Reconciliations
Non-GAAP Financial Measures

This presentation includes the Company’s non-GAAP financial measures: adjusted EBITDA, distributable cash flow, adjusted free cash flow and adjusted operating margin (segment). The following tables provide reconciliations of these non-GAAP financial measures to their most directly comparable GAAP measures.

The Company utilizes non-GAAP measures to analyze the Company’s performance. Adjusted EBITDA, distributable cash flow, adjusted free cash flow and adjusted operating margin (segment) are non-GAAP measures. The GAAP measures most directly comparable to these non-GAAP measures are income (loss) from operations, Net income (loss) attributable to Targa Resources Corp. and segment operating margin. These non-GAAP measures should not be considered as an alternative to GAAP measures and have important limitations as analytical tools. Investors should not consider these measures in isolation or as a substitute for analysis of the Company’s results as reported under GAAP. Additionally, because the Company's non-GAAP measures exclude some, but not all, items that affect income and segment operating margin, and are defined differently by different companies within the Company’s industry, the Company’s definitions may not be comparable with similarly titled measures of other companies, thereby diminishing their utility. Management compensates for the limitations of the Company’s non-GAAP measures as analytical tools by reviewing the comparable GAAP measures, understanding the differences between the measures and incorporating these insights into the Company’s decision-making processes.

Adjusted EBITDA

The Company defines adjusted EBITDA as Net income (loss) attributable to Targa Resources Corp. before interest, income taxes, depreciation and amortization, and other items that the Company believes should be adjusted consistent with the Company’s core operating performance. The adjusting items are detailed in the adjusted EBITDA reconciliation table and its footnotes. Adjusted EBITDA is used as a supplemental financial measure by the Company and by external users of the Company’s financial statements such as investors, commercial banks and others to measure the ability of the Company’s assets to generate cash sufficient to pay interest costs, support the Company’s indebtedness and pay dividends to the Company’s investors.

Distributable Cash Flow and Adjusted Free Cash Flow

The Company defines distributable cash flow as adjusted EBITDA less cash interest expense on debt obligations, cash tax (expense) benefit and maintenance capital expenditures (net of any reimbursements of project costs). The Company defines adjusted free cash flow as distributable cash flow less growth capital expenditures, net of contributions from noncontrolling interest and net contributions to investments in unconsolidated affiliates. Distributable cash flow and adjusted free cash flow are performance measures used by the Company and by external users of the Company's financial statements, such as investors, commercial banks and research analysts, to assess the Company's ability to generate cash earnings (after servicing the Company's debt and funding capital expenditures) to be used for corporate purposes, such as payment of dividends, retirement of debt or redemption of other financing arrangements.
